

TIME SAVING PRODUCTS FROM VR MANUFACTURING

Electric To Hydraulic Converter

FEATURES:

- HIGH QUALITY DELRIN MANIFOLD
- ALL STAINLESS STEEL & BRASS CONSTRUCTION
- NORMALLY OPEN VERSION
- NORMALLY CLOSED VERSION
- STANDARD 1/4" TUBE FITTINGS

PT# RIS-EPV-NO (NORMALLY OPEN)
PT# RIS-EPV-NC (NORMALLY CLOSED)

THE CONVERTER

The Converter is electrically activated manifold assembly that will allow you to replace an old hydraulic controller with a new solid state or electro mechanical type controller. Now you can have the simplicity of a hydraulic valve, plus the timing accuracy offered by today's solid state irrigation controllers. The advantage of using multiple "water saving" programs, adds up to dollars in your pocket. Labor is also saved since you don't have to change or modify your existing valves when upgrading your system. If your valves work now they'll work when the Converter is installed.
