- TESTS FOR SHORTED SOLENOIDS
- TESTS FOR BROKEN WIRES
- ACTIVATES VALVES
- TESTS FOR 24VAC
- RUNS ON A SINGLE 9V BATTERY
- IDENTIFIES GOOD SOLENOIDS
- LOW BATTERY SIGNAL

The Quick Check

The Quick Check is a new revolutionary diagnostic tester brought to you by VR Manufacturing. The Quick Check will test solenoids, transformers, relays, fuses, wires, power output, as well as activate your solenoids. What makes this new tester unique is that it runs on a single 9v battery. This energy efficient tester will run a valve for over three hours straight on a single battery! How's that for performance? It's very easy to use because it's red, yellow, and green lights give easy to see go-no-go readings that anyone can understand! For more information please contact us at 1-309-937-4133, or ask your local distributor.
